

K A I V O

BRAND SYSTEM / VERSION 1.1

RUN YOUR BUSINESS.
ELEVATE EXPERIENCES.

A premium operating identity for modern hospitality.

A calm operating layer for ambitious hospitality brands

KAIVO is designed to feel composed, capable and quietly advanced. It should never look like generic marketing software. The identity balances architectural geometry with a warm hospitality palette.

PRECISE Grids, equal strokes and deliberate spacing signal operational confidence.	PREMIUM Restraint, whitespace and warm gold create value without decoration.
HUMAN Ivory surfaces and clear language keep the technology approachable.	ADAPTIVE A modular mark scales from favicon to venue signage.

Primary tagline

RUN YOUR BUSINESS. ELEVATE EXPERIENCES.

Use the tagline on corporate, launch and high-level brand communications. Product interfaces should usually use the mark without the tagline.

The wordmark is custom artwork, not a font

The geometric K, crossbar-free A and broken O form the recognizable KAIVO silhouette. Never rebuild the logo by typing the name in a font.

Preferred use

Use KAIVO Ink on Warm Ivory or white. Use the reversed white mark on KAIVO Ink. Signal Gold is a premium accent version for controlled applications, not the everyday default.

Every letter follows one construction logic

Element	Construction rule
K	Equal stroke widths; diagonals return to a centered joint.
Λ	No crossbar; centered apex; symmetric legs.
I	Single vertical stroke matching the logo system.
V	Mirrors the Λ angle to create rhythm.
O	Circular ring with a narrow 18° cut centered at 3 o'clock.
Spacing	Optically wide; never compress or manually kern.

Master canvas: 930 × 220 units / nominal stroke: 20 units.

One selected icon, two exploratory concepts

01 / Orbit-K — selected

The broken ring contains the K. Best all-purpose mark for app, social and favicon use.

02 / Portal-O

A pure broken O with a transition line and signal dot. Useful as a motion or loading motif.

03 / Signal-KO

The K intersects the ring with an indigo signal chevron. Best reserved for product experiments.

Give the mark room to feel premium

Define X as the width of the logo's vertical I stroke. Keep at least 3X clear space on every side of the wordmark and 2X around the standalone icon.

DIGITAL WORDMARK Minimum width: 120 px	PRINT WORDMARK Minimum width: 28 mm
DIGITAL ICON Minimum size: 16 px	PRINT ICON Minimum size: 6 mm

A near-black system warmed by ivory and gold

Ink and Ivory carry most of the brand. Gold is an accent; Indigo belongs mainly to product states and AI moments.

KAIVO Ink
#0A0B0D

Geometric headlines, highly legible product text

DISPLAY	Space Grotesk Medium / Semibold Headlines, launches and selected navigation moments. Open license: SIL OFL 1.1
BODY & UI	Inter Regular / Medium / Semibold Interface, documents, long-form copy and numbers. Open license: SIL OFL 1.1
ALTERNATIVE	Manrope Use when a single family is preferred across display and body. Open license: SIL OFL 1.1

The KAIVO wordmark is always supplied artwork and must never be recreated using any of these fonts.

Use a clear, quiet typographic hierarchy

DISPLAY / 64 KAIVO runs the experience.

H1 / 40 KAIVO runs the experience.

H2 / 28 KAIVO runs the experience.

LEAD / 20 KAIVO runs the experience.

BODY / 16 KAIVO runs the experience.

META / 12 KAIVO runs the experience.

Use sentence case for most interface and editorial copy. Uppercase with generous tracking is reserved for concise labels and the brand tagline.

Use high contrast and the approved artwork

DO

Use master files. Preserve proportions. Keep the O gap at 3 o'clock. Choose the variant with strongest contrast.

DO NOT

Stretch, rotate, outline, add effects, recolor individual letters, close the O gap, add a crossbar to Λ, or place on noisy imagery.

Background rule

On photography, use a quiet region with strong contrast or place the mark on a solid Ink/Ivory holding shape. Avoid drop shadows as a rescue technique.

Make technology feel atmospheric, not synthetic

Photography should show intentional hospitality: considered lighting, tactile materials, confident operators and real guest moments. Favor warm neutrals, rich blacks and controlled color.

Avoid generic robots, neon brains, busy dashboard collages and literal AI imagery.

Motion signature

1. A point expands into the broken ring. 2. The ring completes its long arc but preserves the gap. 3. The K draws from the center joint. 4. The wordmark enters with measured tracking. 5. Total duration: 800–1200 ms; use the system ease curve.

Product surfaces are calm, spacious and decisive

Token	Value	Use
Grid	4 px base	Spacing, icon and radius alignment
Body	16 / 24 px	Default product copy
Radius	6 / 10 / 16 px	Controls, cards, large surfaces
Gold	Accent only	Focus, premium moments, selected states
Indigo	AI/product state	Automation, generation and intelligence cues
Motion	120 / 220 / 420 ms	Micro, default and considered transitions

Machine-readable tokens are included as JSON, CSS custom properties and a Tailwind theme snippet.

Lead with the icon in small social contexts

Use the Orbit-K icon for avatars. Use the full wordmark in banners only when there is enough width to preserve clear space. Keep important text in platform-safe zones and verify crops after upload.

Stationery stays restrained and premium

Editable business card artwork, A4 and US Letter letterheads, an HTML email signature, and presentation cover templates are included in the pack.

Choose the format that matches the job

Format	Best use
SVG	Web, product UI, Figma, modern layout tools
EPS	Illustrator-compatible exchange and legacy print workflows
PDF	Vector placement, print handoff and review
PNG	Transparent raster use in office, social and email
DOCX	Editable business correspondence
PPTX	Editable presentation covers
JSON / CSS / JS	Design-system and development handoff

Adobe Illustrator can open the supplied SVG, EPS and vector PDF files. A proprietary .ai file is not included because it requires Adobe Illustrator; save an opened master as .ai if your workflow needs it.
